

At first, I used to drive around talking on my phone, and now you can't do that anymore. that gave me the best feeling. Now it is a universal problem. I used to run in the morning, and sometimes at night. The cement on my shoes was always too harsh on my knees. Despite my trouble with my environment

The trap I had unintentionally set for myself was the hidden vacuum in space that we all need.

An old saying goes:

A man wakes up early in the morning to hunt ducks
the water is so clear that morning
He sees fish swimming around the pebbles and rocks
near the overgrown grass

I followed the story closely, and came up with the process I am going to share with you now. You are sometimes not aware within your own life.

In moments of clarity watch the wheels turn on all vehicles

The secret is when you are alone
Take a minute to look at the floor
if you see a face and it is smiling
You will have good luck for many years to come!
if it is an angry face you must quickly enter another room
There you must look at the ground until you
find a corner

After finding a face
go out to the garden and walk 7 paces North
then venture 5 paces to the left
continue to your other right 2 steps
You must dig a hole there.
the dimensions are 14 inches long, 5 inches wide, and 8 inches deep
after you are done digging, turn your head to see if anyone is looking
take off your shoes and socks and then
place your foot in the hole
call 4 friends from where you are standing
and you will have the best of luck !!!
remember to email them this message later

PASS IT FORWARD !

There are no side effects
Pure luck over unrelenting strategy
You will persevere
You will survive
Look at the floor and you will see faces
